

QUICK START GUIDE

SSC **Neutrino**

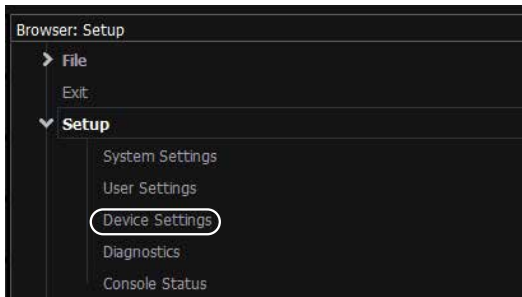

1) (Windows only) Install Drivers

- Download and install **CH340G Driver Installer.exe**
 - www.subatomicshowcontrol.com/driver
- Click **Yes** to allow the app to make changes
- Click **Install**

2) Configure ETC Eos

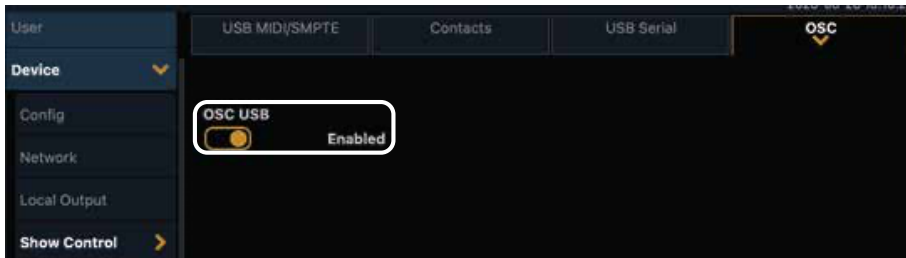

- Open **Device Settings** in the CIA

MacOS Note:

It may be necessary to restart Eos after plugging in the Neutrino for it to connect.

- Enable **OSC USB** in the **Show Control** tab

- Restart Eos for the changes to save

3) Open **Tab 36** and begin configuring your faders!

- Faders are numbered left to right from 1 to 10

4) To **set the page** on your Neutrino:

- When you plug in the device, the current page is indicated by an LED
- To change the page, press another button within 1 second
- You will see another LED illuminate, which is the new page.
- The page is saved until you change it again.
